

FIND THEIR SIZE

Little feet grow fast! Measure them before you place your order.

FOR SHOE SIZING ACCURACY:

1. Print this page at 100% on 8.5" x 11" paper.
2. Check to see if a credit card fits in this space.
3. If it does, you're good to measure!

HOW DO I MEASURE?

1. Make sure pants are rolled up and socks are snug (but not too tight).
2. Place the sizing tool on the floor next to a wall & have your child stand on it against the wall, with heels at the heel line.
3. Mark where the tip of your child's big toe ends, then add about a thumb-width space to determine a comfortable shoe size.

Remember—shoe brands vary, so your child may need to try on multiple sizes to ensure a comfy fit! If your child has wide feet, try wide-width styles in addition to standard sizes.
